Full Stack Developer | Node.js • React.js • Express.js • SQL / MongoDB

SUMMARY

Full Stack Developer with 2+ years of experience shipping production business applications end-to-end using React.js, Node.js, Express.js, MySQL, and MongoDB. Built and deployed 8+ internal systems automating manufacturing and order workflows — inventory management, purchase-approval automation, real-time dashboards, and production tracking. Comfortable owning a feature from database design through REST API to UI.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful API design, JWT Authentication

Databases: MySQL, MongoDB, MS Access (legacy system integration)

Tools & Practices: Git, GitHub, Postman, npm, VS Code, Agile/Scrum collaboration

EXPERIENCE

Full Stack Developer — Anu Worles Tech Pvt. Ltd.

Feb 2024 – Present

- Engineered and maintained 8+ full-stack business applications that replaced manual, spreadsheet-based manufacturing workflows with automated systems used daily across production and store departments.
- Optimized SQL queries and backend API logic on high-traffic internal dashboards, resolving slow data-retrieval and page-load issues flagged by end users.
- Designed and shipped scalable REST APIs powering inventory, order, and production-tracking systems used daily by internal production and store teams.
- Built a library of reusable React components adopted across multiple internal applications, reducing new-feature frontend build time.

PROJECTS

Carbide Management System

React.js • Node.js • Express.js • SQL • Google Gmail API • Tailwind CSS

- Built a real-time carbide inventory system tracking stock availability and material planning across production and store departments.
- Designed REST APIs for inventory, supplier orders, and automated email notifications, eliminating manual order follow-ups.
- Improved stock visibility, replacing manual stock-checking with a live view of availability for proactive material planning.

Indent Tracking System

React.js • Node.js • Express.js • MS Access • SQL • Nodemailer • jsPDF • Tailwind CSS

- Built an end-to-end purchase request and approval workflow, replacing a manual paper/email process for company indents.
- Implemented role-based authentication with automated approval/rejection email notifications, removing manual back-and-forth in the approval chain.
- Automated Purchase Order (PO) PDF generation and supplier email delivery post-approval.

Order Summary Dashboard

React.js • Node.js • Express.js • MS Access • Recharts • Tailwind CSS

- Built a real-time dashboard to monitor customer orders, delayed UIDs, and rejection reports for management decision-making.
- Implemented dynamic filters, charts, and drill-down reports, replacing manual spreadsheet reporting for management.

Work Entry System

React.js • Node.js • Express.js • SQL • MS Access • Google API • WebSocket • Tailwind CSS

- Built a real-time production tracking system with WebSocket-based live updates for employee-wise work entry, job timing, and automated offline-event alerts.

EDUCATION

Bachelor of Computer Applications (BCA) — HLM College, CCS University 2019 – 2022
